## **INFORMATION BULLETIN**

**Date:** February 18, 2019

**Bulletin:** JC-19-02

**Product Type:** Ryan Heavy Duty Sod Cutter

**From:** Craig Ransavage, Ryan Product Manager

**Subject:** Heavy Duty Sod Cutter Length of Cut Metering Wheel & Trip Dog Pins

We are writing to make you aware of an important detail as it pertains to adjusting the cut length of our current Ryan Heavy Duty Sod Cutters. (Model numbers: 544853G, 544854G) Both come standard with one trip dog pin (P/N 515494) which allows for a standard cut length of 72" inches. **If your customer needs varying cut length capability, (12", 18", 24", 36") additional dog pins will be required.** These are sold separately as service parts and a total of six will give you the full range of cut length options as needed. You can find more specific information and important chart details (see chart on page 17) in the Operator's Manual or in the parts list (Page 56 -57).

Please share this information with your appropriate teams. If you have any further questions or need further assistance, please call Technical Support at 866-469-1242. Thank you for your continued support.
