Sales Bulletin

Date: August 7, 2015

Bulletin No: JC-15-04

Product Type: STEINER 440 with 75-71207A WT201 Weight Transfer Kit

We originally designed a Weight Transfer Kit for the 440 tractors as an option to improve stability and balance when handling heavy attachments. This is accomplished by transferring weight from the attachment to the tractor drive wheels providing better traction on slopes. This boost system is also adjustable on the go.

We have discovered there are other advantages to having a Weight Transfer Kit installed on the tractor when not using heavy attachments. Some benefits include easier steering on slopes, and better stability on uneven terrain and landscape contours.

Action required:

- A. We highly recommend the sale of the 75-71207A WT201 Weight Transfer Kit with all 440 tractor purchases.
- B. Order the kits and install them onto the tractors you have sold or are going to sell

Products Involved:

- A. All of the 440 models 75-72010, 75-72011, 75-72012, and 75-72013

Warranty:

- A. No warranty applies.

If you have any questions, please contact our Customer Service Department at 920-699-2000.
