

INTRODUCTION: This instruction sheet covers the installation of the Anti-Scalp Kit for 48"decks.

ASSEMBLY INSTRUCTIONS:

1. Ensure the engine is off and the key is removed from the ignition switch prior to installation.
2. Layout and mark the holes for the anti-scalp brackets (Items 1 & 2) as shown in Figure 1. The top hole of the bracket should be located 0.75in. down from the top of the deck and 1.75in. from the edge of the deck.
3. Using a 13/32 drill, drill holes where located in step 2.
4. Install the LH bracket (Item 2) as shown in Figure 1 using two bolts (Item 3) and two nuts (Item 5).
5. Install the RH bracket (Item 1) as shown in Figure 1 using two bolts (Item 4) and two nuts (Item 5).
6. Install the anti-scalp rollers (Item 7) using one bolt (Item 8) and two nuts (Item 6) onto each brackets as shown in Figure 1 into the desired position.
