## INFORMATION BULLETIN

**Date:** June 15, 2011

**Bulletin No:** JC-009-11 – PTO Belt Guide Placement Instructions

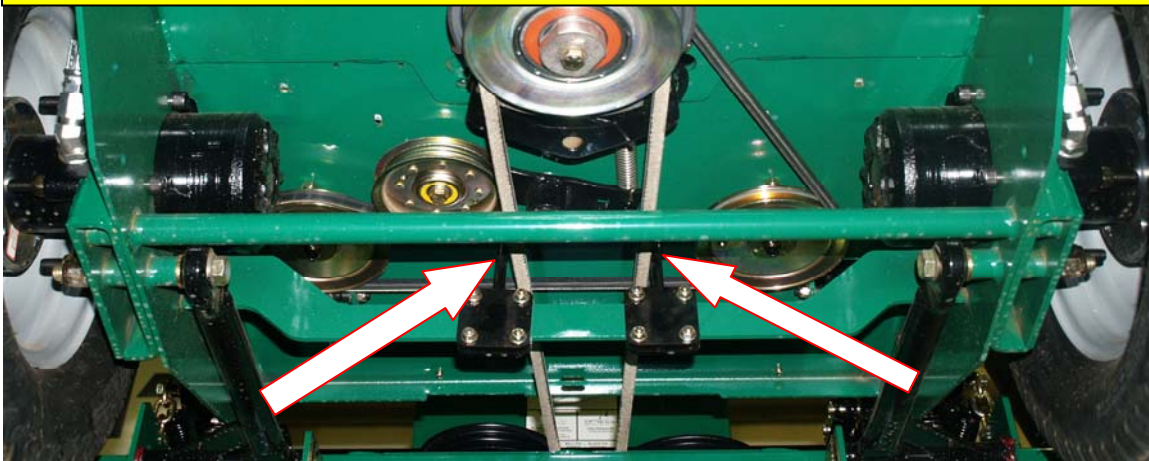

**Product:** ProCat & Predator-Pro G Series Mowers  
9425xxG models ("x" representing any digit)

**IMPORTANT INFORMATION:** PTO Belt Guides did not exist prior to G Series ProCat and Predator-Pro units. The placement of these guides is critical to prevent premature belt failure.

See below illustration for clarification on the proper position of PTO Belt Guides.

Guides should just barely touch the belt (not pushing in on the belt) to a **MAXIMUM ¼" gap between guide and belt.**

On a new unit, you want it barely touching, then when the belt seats in you will have your gap. On an older seated in unit you can set it with a gap.

**WARRANTY:** Not applicable

If you have any questions, please contact Customer Service at 920-699-2000.

This bulletin is relevant to the departments checked below. Please circulate as appropriate.
