Product Type: PARTS BULLETIN

Bulletin No: JC-015-08

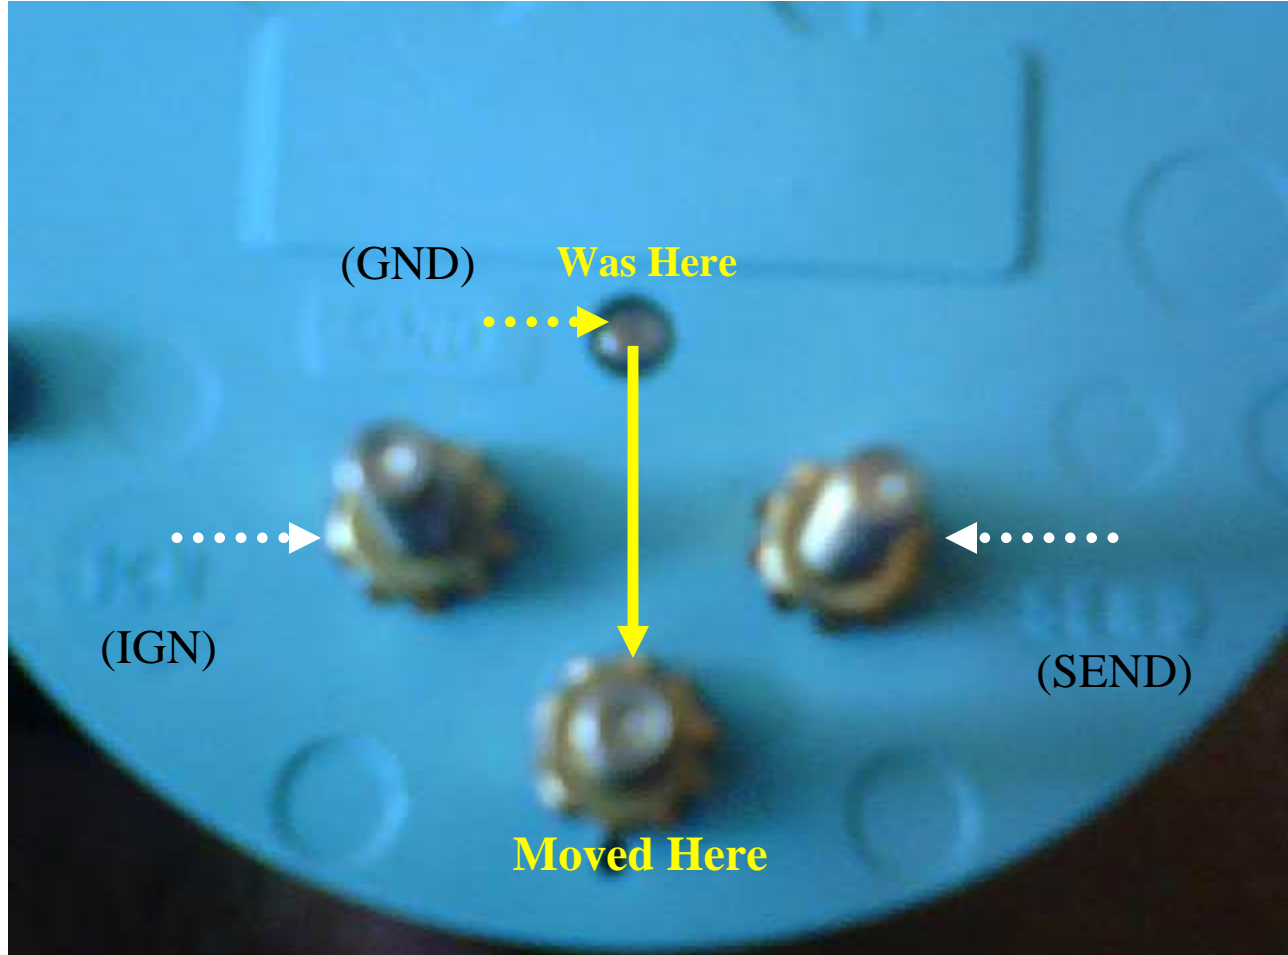

Tach (35-096) Change

ISSUE: The manufacturer of our Tach 35-096 made a running change that is not self explanatory. They moved the location of the ground terminal but retained the original marked housing which makes it confusing as to the identification of the terminals.

CORRECTION: Refer to the picture below. All they did was relocate the ground terminal. The Ignition and Sending terminals are still in the same location. Simply attach the ground terminal to the post shown and all will be fine.

PARTS INVOLVED: 35-096

THIS IS THE NEW CONFIGURATION

35-096 Tachometer

For Reference: This is what the Tach 35-096 Looks Like

This was the original configuration

LT+ = light wire
GND = Ground wire
IGN = Ignition 12 volt when key is on
SEND = Reads the signal from the regulator/stator

If you have any questions please contact Commercial Grounds Care, Inc.
