## Information Bulletin

**Date:** November 20, 2014

**Bulletin No:** JC-14-12

**Product Type:** New Boss-Vac® bagger and Dump From Seat Collection Systems

**Customer Issue:** Belt on deck does not align with pulley for catcher.

**Cause:** Pulley variations to accommodate increased deck travel over the course of multiple years of production results in the possibility of a different pulley being needed than what is already provided in the standard kits.

**Action Required:** Review the following chart prior to purchase or sale to determine if the catcher will require a different pulley for your application. If you need a new pulley for your model and serial number Boss Vac®, please purchase the required pulley. BOB-CAT will reimburse you for the cost of the new pulley by submitting a warranty claim. Any models not mentioned here will fit as indicated on previously distributed sales advisory. **NOTE:** The new Boss-Vac® catchers are not designed to fit F series and prior units.

**Products Involved:** 970473, 970474, 970512 and 970513 kits

**Warranty:** For units on this chart that require a different pulley; file a “parts only” claim for the pulley. Note: These catchers are serialized and require registering them just like a mower.

If you have any questions, please contact our Customer Service Department at 920-699-2000.

This bulletin is relevant to the departments checked below. Please circulate as appropriate.
